- Board: BSEB
- Percentage - **60.00**

Matriculation - **2015**

- Board: BSEB
- Percentage - **60.6**

PROJECT

College Space

- Online space for our college students that has information on **courses, syllabus, study materials, college map, college, imp. notice circular, etc.**
- We currently work to be developed totally in react-redux and node frame-work from **PHP, HTML, CSS, JavaScript.**
- I was the front-end team head for this project.

Speaker Identification

- **Speaker adaptation** is a subset of the Automatic Speech Recognition (ASR) system in which the problem is focused on **identifying the speaker** and executing the command that the speaker is speaking about. • In the age of automation and the Internet of Things (IoT), voice authentication systems have become popular. Its ease of use, security, and personalized behavior makes it an ideal choice. E.g. **Alexa, Google Home, etc.**

SKILLS

Java, HTML, CSS, Bash, Git, PHP, Laravel

COURSES

DS and Algorithm, OS, DBMS, SQL

DEVELOPMENT TOOLS

Microsoft Visual Studio, Pycharm, Xampp

LANGUAGES

English, Hindi
